HANDLING & STORAGE:

It is recommended to store CB - 7041 at a temperature of 5-25°C and low humidity in securely closed containers. Storage premises should be cool and adequately ventilated. For safety purpose it is advisable to keep the storage area clean. The product has to be handled carefully and any contact with skin should be avoided. Sound working practices should be adopted so that the product is not released into the atmosphere. Material should be kept away from spark and heat sources. Direct exposure to sunlight should be avoided.

CAUTION:

The resin should not be allowed to pollute the ground under any circumstances. Inhalation of vapors may cause drowsiness and dizziness. Due to its low flash point the resin may result in fire hazards, if exposed to unguarded flame & possible sources of ignition.

Note: All the above information is based on the results of the test carried out at our laboratories to the best of our ability. The figures are intended to give a general indication of the characteristics of the product. No liability must be assumed or implied as a result of the data given.
